

Many body interactions in freestanding and epitaxial graphene

Alessandra Lanzara

Department of Physics, UC Berkley, USA

CV:

1999 PhD La Sapienza U., Rome

1999-2002 postdoc, Stanford

2002 – Professor, Physics, U. California Berkeley

Research : condensed matter physics, high temperature superconductivity; Dirac materials such as graphene and topological insulators. Time, spatial and spin-resolved photoemission spectroscopy.
