

Momentum dependent excitations in cuprates studied by high resolution RIXS

Giacomo Ghiringhelli

Physics, Politecnico di Milano, Italy

CV:

2001 PhD Physics, Grenoble

2001 Assistant Prof of Experimental Physics, Politecnico di Milano

2005 Associate Professor

Research: experimental resonant x-ray spectroscopies (XAS, RIXS, spin resolved XPS); new instrumentation for high resolution soft X-ray RIXS at ESRF and SLS. Most recent results are L edge RIXS for studies of cuprates and other strongly correlated systems
