

Surface states as a bonanza for spin-polarized electrons

Juerg Osterwalder

Physik-Institut, Universität Zürich, Switzerland

CV:

1985 PhD Physics, ETH Zürich

1985-1987 Postdoc, U Hawaii, USA

2001- Professor, Physics Universität Zürich.

Research: surface physics, including clean and adsorbate covered metal surfaces and monolayer films, and their study by photoemission techniques and STM.
