

Novel Electronic Properties of Layered Compounds and Tunnel Junctions: Prospects for Superconductivity and Magnetism

Amina Taleb-Ibrahimi

CNRS, Synchrotron SOLEIL

CV:

1986 Doctorat d'ETAT des Sciences Physiques, Paris

1986 - 1989 postdoc. T. J. Watson Research Centre

1989 – Senior Staff Scientist, CNRS at LURE

2004 – Synchrotron Soleil

Research : Electronic structure of low dimensionality systems, surfaces/interfaces, strongly correlated systems, synchrotron radiation instrumentation
