

Molecular Mott-Hubbard Transition – Pressure Induced Insulator-Metal Transition of Main Group Organometallics

John Tse

Physics, University of Saskatchewan

CV:

1980 PhD Chemistry, UWO, Canada

1980-2004, NRC, Ottawa

2004 – Professor & Canada Research Chair,
Physics, U. Saskatchewan

Research: fundamental principles governing the structure, stability and thermodynamics of materials; prediction of material behavior. Synchrotron and neutron experiments at high pressure; computational materials science
